DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 6-17-05 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

The information disclosure statement filed 6-17-05 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2855

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Liebgen (US 5090247).

Regarding claims 11-20 Liebgen teaches a pressure sensor element 20 having a diaphragm area (abstract); and a first fixing area 14, a pressure to be measured exerting a force action on the diaphragm area, the first fixing area 14 being connected to a second fixing area 16 of a fixing element 40 to fix the pressure sensor element 20; wherein the first fixing area 14 and the second fixing area 16 are pressure-loaded by the force action (col. 2 lines 28-30).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 6300169 and 4939497 disclose semiconductor assemblies relevant to the apparatus as claimed.
